

OIL & GAS COMPRESSOR STATION EXPANSION

-

SCOPE OF WORK MECHANICAL

A large midstream oil & gas company required expansion of the existing compressor station which included installation of an additional compressor, thermal oxidizer system, tank farm, and associated piping. This elaborate, turnkey compressor station expansion was handled with expert hands of the M. Davis & Sons mechanical team.

CHALLENGES ON PROJECT

Technical complexity of this job along with the harsh winter weather in upstate NY made meeting the very demanding schedule challenging.

M. DAVIS SOLUTIONS

M. Davis & Sons specializes in complex, unusual projects that require out-of-the-box thinking and ambitious solutions our clients do not find elsewhere. The vast experience of our trade professionals paired with our innovative approach to construction allowed us to meet the customer's schedule easily and stay under budget with zero safety incidents.
