

VTi by M. DAVIS

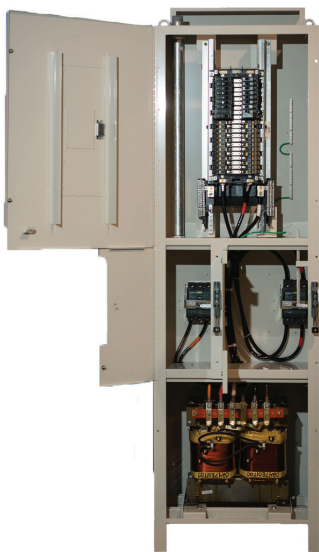

## POWER DISTRIBUTION EQUIPMENT

In addition to our full range of fabrication, mechanical, and electrical services, M. Davis and Sons is also a manufacturer and supplier of low voltage power distribution equipment for industry, through our newest division, VTi by M. Davis (VT-inc.com).

VTi by M. Davis offers a line of highly reliable and versatile equipment designed for a broad range of applications; these include power distribution for in-plant applications, temporary power for construction sites, and equipment for critical process protection.

### VTi by M. DAVIS PRODUCTS

- Portable power distribution equipment (PPDC) – Solve temporary power distribution problems at low cost for all types of portable or fast turn-around situations in industrial plants and construction projects.
- Fused distribution panels (FDP) – Provide electrical power distribution in applications requiring high-speed clearing of branch-circuit load faults from the supply source.
- Unitized distribution systems (UDS) – Stand-alone low-voltage power distribution units that are popular with engineering firms, plants, and facilities due to their smaller footprint and reduced PPE requirements. The UDS is also customizable for accessories such as lighting contactors and heat trace EPD breakers.

Contact M. Davis for more information about power distribution equipment

Projects range from \$1,000 to \$15 million in scope.

Our services are provided by over 400 skilled team members.

We have \$25 million in aggregate bonding capacity.

M. Davis and Sons was established in 1870 and incorporated in Delaware in 1974. In 2017, M. Davis and Sons acquired VTi, Inc., a Newark, DE-based electrical manufacturer.

Peggy Del Fabbro  
CEO

From small factory retrofits to new plant system installations, M. Davis offers complete construction, fabrication and maintenance capabilities for mechanical, electrical and control systems. Our turnkey solutions for new construction, expansion, maintenance, and capital development enable clients to operate with customized equipment configurations, expertly fabricated to their exacting and unique specifications, and innovative control systems that keep their facilities efficient and safe.

We understand the compliance regulations across industries and adhere to the highest production standards so our customers can focus on their operations with confidence.
